

NEWS RELEASE

The TickIT^{plus} Kick Start Guide has been launched

Ely, England, 5 July 2011 – Following the release late last month of the [Base Process Library](#), the [Kick Start Guide](#) - the essential guide for all organisations pursuing TickIT^{plus} certification - has been launched. The guide can be purchased here www.itgovernance.co.uk/products/3469 in a PDF format or hard copy.

The guide will provide organisations that need to achieve compliance with the TickIT^{plus} scheme with information about identifying and selecting the scope of certification and developing in-house resources. It contains guidance on identifying processes, mapping them to TickIT^{plus} processes and establishing the assessment strategy. The TickIT^{plus} Kick Start Guide also offers advice on preparing for, participating in and following up an assessment.

TickIT^{plus} is the successor of TickIT and provides improved process modelling to facilitate more efficient business and quality systems planning and improvement. TickIT^{plus} gives entry level access to capability grading for small IT organisations and offers significant cost savings for those already pursuing both ISO9001 and Capability Maturity Measurements.

As an introductory guide, the TickIT^{plus} [Kick Start Guide](#) concentrates specifically on achieving the Foundation level of the scheme, either through initial entry or transition from the existing TickIT scheme.

The [Kick Start Guide](#) can be purchased today from www.itgovernance.co.uk/products/3469.
